Subject: Let go of the Microsoft debacle!

It is time to put this case to an end once and for all! In a country where Free Enterprise is a cornerstone to our history, and our current culture, why is the Justice Department continuing to pursue this ridiculous persecution of a company whose only crime is being the first to come up with the idea of contracting with computer manufacturers, and making a better product? If Microsoft does not have a better product the public will discover it and the better product will survive!
